Experience

WOLTERS KLUWER
Senior Product Designer
Jun 2021 - Jul 2026 - Internacional - Remote

• Designed **complex financial B2B SaaS products** for accounting and professional-services firms across multiple international markets.
• Led **end-to-end product design** from discovery, customer interviews and research through product definition, interaction design, prototyping, validation and implementation collaboration.
• Designed complex financial workflows spanning client management, document management, portals, tasks, time tracking, e-signature, permissions and tax-related processes.
• Translated business rules, operational dependencies, regional requirements and technical constraints into clear and scalable product experiences.
• Partnered with Product, Engineering, Architecture, Business Experts and **international stakeholders** to define product direction and resolve cross-product dependencies.
• Contributed to the evolution of a **Global Design System**, improving consistency, accessibility and reusable interaction patterns across products.
• Used **research, prototyping and validation** to inform design decisions and communicate rationale to stakeholders across different markets.
• Designed and shipped **AI-assisted product experiences** and built an AI agent concept, using rapid prototyping to investigate **how AI could support users within complex workflows.**

FROG
Product Designer
Feb 2019 - Jun 2021 - Madrid

Designed **multi-device and connected experiences** across Telefónica's ecosystem. **Mobile, desktop, TV and voice**.
• Designed consumer-facing experiences including Smart WiFi, Secure Connection and Living Apps across multiple devices.
• Designed complex operational tools, including a CMS and partner dashboard used to create, manage and monitor Living Apps.
• Defined user flows, interaction models, high-fidelity prototypes and design specifications for research, testing and development.
• Collaborated with Product, Engineering, Research and Business teams throughout the product lifecycle.
• Balanced user needs, business goals and technical feasibility when presenting and defending design decisions.

FREELANCE EXPERIENCE
Front-end and Graphic Design
Jan 2018 - Feb 2019 - Spain Remote

Designed and built responsive digital experiences, combining UX/UI design, front-end development and implementation to take concepts from idea to working product.
